Please indicate which session(s) you will be attending on Wed., April 20, 2016

Time: 11:00 a.m. - 12:00 p.m. (presented by Weyerhaeuser)

Session One: Residential Framing for Green Certification (BLS900) 1 CEU/HSW

Identifies the process of building a case and the credits for iLevel products and services for a LEED home certification. Using the ICC-ES Save report that prequalifies Weyerhaeuser TrusJoist products and services to the major green certification programs and how each green requirement can be met.

Time: 12:30 p.m. - 1:30 p.m. (presented TruStile Doors) (TRUSD1) 1 CEU/HSW

Session Two: Opening the Door to Green Building & Sustainable Design

This course explores how MDF and Wood stile and rail doors fulfill Green Building principles and contribute to LEED certification. At the end of the program, participants will be able to:

- Understand how doors can contribute to Green Building and Sustainable Design.
- Understand green product options for paint grade doors that contribute to LEED Credits.
- Understand green product options for stain grade doors that contribute to LEED Credits.
- Understand ways door manufacturers can contribute to green manufacturing & sustainable practices.
